Extreme care should be used when cleaning suede. It is difficult to keep clean and you should consult a professional upholsterer for cleaning tips. This solution contains oxygen enriched reverse osmosis water, detergent and white spirit/alcohol. No responsibility is taken for the application of this product.

## **Liquid Pearl Nu-Buck Suede**

To clean suede:

Rub the surface of the garment with a clean bath towel. This brings up the nap. You can also use a nap brush or a soft hand brush

Try to remove small dry stains... apply cleaner sparingly. Small stains that are still wet should be blotted up by putting a paper towel on it and a weight on top of the towel.

Stains may also be rubbed off with a damp towel and the cleaner. Allow the leather to dry before assessing your success. Repeat the process if necessary. Be warned though, gently does it.

If there are lumps of dirt or dry scuff marks that won't come off this way, try rasping them off with a fingernail file.  
Be gentle.

Contains: water, White alcohol, detergents (1/800).

**Do not swallow. Keep away from Children. Wash off skin thoroughly. If in eyes, rinse for 15 minutes. If inhaled, move to fresh air area. If swallowed, drink copious amounts of water.**
